In-text citations

Citations should be numbered in the body of your paper with a superscript numeral (keyboard shortcut: CTRL+SHIFT+=). The superscript numbers should be placed OUTSIDE periods and commas and INSIDE colons and semicolons. Examples:

- As reported in a previous study,\(^2\)...
- The results of the study support my thesis\(^7\); however, further studies should be done...

When 2 or more references are cited at a specific place, list each citation separated with commas and no spaces. You can use hyphens for a series. Example:

- As reported in previous studies,\(^6,7,9,13\)

When citing a source more than once, list the page numbers in parentheses after the superscript. For example:

- Maciocia later states that excessive consumption of hot foods may affect the Liver.\(^3(p439)\)

**PERSONAL COMMUNICATION:**

Personal communications or information that has not yet gone to publication should be not listed on the reference page, but should be cited in the text of your paper. Personal communications should list the name of the source, any educational credentials, mode of communication, and the month and date. Unpublished work should include name of the researcher/author, any educational credentials, and the month and date of the research.
